

Reactive transport in porous media

Modelling of the fate of contaminants in porous media can be a tool to e.g. evaluate remediation technologies. The project will include:

- Process identification
- Formulation and solution of mathematical models
- Data analysis
- Technology evaluation
- Risk assessment

Project type

Topic is suitable for MSc and BSc projects

Pre-requisite

12330 Contaminated sites, supplementary 12331 Field investigations

Group size

1-2 students

Department of supervisors

Main supervisor: DTU Environment

Co-supervisor: DTU Environment

Contact person

Professor Philip J. Binning, DTU Environment (pjbi@env.dtu.dk)
