

Fate and transport of chlorinated solvents in chalk aquifers

To protect our primary drinking water source we need more knowledge on the fate and transport of chlorinated solvents in chalk aquifers. The project will investigate the effect of fractured media, abiotic degradation and biodegradation (using stable isotopes) and evaluated risk.

Project type

Topic is suitable for MSc and BSc projects

Pre-requisite

12330 Contaminated sites, supplementary 12331 Field investigations

Group size

1-2 students

Department of supervisors

Main supervisor: DTU Environment

Co-supervisor: DTU Environment

Contact person

Associate professor Mette M. Broholm, DTU Environment (mubr@env.dtu.dk) or Professor Poul Bjerg, DTU Environment (plbj@env.dtu.dk)
